ABOUT THIS PROGRAMME

Cybersecurity threats and attacks are regarded as one of the top risks facing businesses and government's today. With increasing threats of ransomware attacks, geopolitical threats, and breach attempts of citizens' personally identifiable information, cybersecurity awareness is of critical importance to the public sector, especially within the context of risk management. This course is designed specifically for the public sector and aims to equip employees, managers and leaders with appropriate information about cyber threats and knowledge about cybersecurity risk management.

- Gain an understanding of what cybercrime is
- Learn about the role of cybersecurity in negating cybercrime
- Identify the various cyber threats posed to individuals and organisations
- Understand who is responsible for these threats and about how individuals and organizations can be protected
- Gain an understanding of the motives of those who conduct cybercrime
- Learn about the aftermath of individuals or companies being compromised through cybercrimes
