Design Thinking and Innovation

NURTURING 21ST CENTURY SKILLS

High-impact, micro-learning for
the digital economy.

ABOUT THIS PROGRAMME

Innovation and creativity are ranked as top skills for any person seeking to be employable in the 21st century labour market. Design thinking is a human-centric approach to innovation and creativity. This course introduces design thinking as a methodology that can enable innovation and creativity. The course demonstrates how individuals and organisations can use curiosity and design thinking skills to identify and choose opportunities for creative solution-finding. An overview of design thinking mindsets and tools are provided to help students understand design thinking as a problem-solving approach.

- Understand the core concepts and mindsets of creativity, design and innovation
- Explore ideas and tools to help people work more creatively
- Master the design principles that will help you create user-focused solutions
- Explore collaborative approaches to ideation
