06 // INFORMATION AND DIGITAL TECHNOLOGY PROGRAMMES

MANCOSA is registered with the Department of Higher Education and Training (DHET) as a private higher education institution under the Higher Education Act, 1997 (as amended). Registration No.2000/HE07/003.

Principal's Message

There is a need to raise the skills base in the workplace through the pursuit of appropriate qualifications from a reputable higher education institution.

MANCOSA strives to ensure that its students develop valuable life skills and become independent and confident individuals. These life skills enable students to deal more confidently with challenges that confront them in the world of work.

MANCOSA academics are committed to lead students through the journey of academic exploration by applying theory to practice. MANCOSA ensures that the programmes it offers are sufficiently rigorous to equip students with the values of hard work, commitment and sacrifice.

Join the MANCOSA world of academic excellence where learning is both fun and a challenge to prepare you to succeed in a competitive working environment.

We wish you well in your studies.

Professor Magnate Ntombela
Principal

Welcome

Deciding to study is an important investment in your future. It is crucial that you choose the programme and school which is right for you.

Making a career choice today can be a very challenging decision in a globalised and competitive environment.

Why Choose skillME?

The design of each skillME programme incorporates academic and industry knowledge, which are derived through MANCOSA'S experience in the higher education market, awareness of 21st Century employer demands, and industry collaborations.

MANCOSA skillME programmes are designed and delivered by industry and academic experts, thereby ensuring that students are exposed to the contemporary practices.

Each skillME online short learning programme is designed to develop specific skills which promote career success. The skillME online short learning programme suite offers students to opportunity to obtain multiple skills on a single, easy to navigate platform.

Leveraging Generative AI for Workplace Efficiency

ABOUT THIS PROGRAMME

This course covers the exploration of Artificial Intelligence (AI) and Generative AI, such as Google's Bard and OpenAI's ChatGPT and DALL-E, which have become prominent topics of discussion in various settings. It emphasises the accessibility of these technologies, making them available to a wide audience. The primary objective is to demystify AI, particularly Generative AI, by simplifying complex concepts. The course delves into the substantial impact of Generative AI in the workplace, addressing its effects on jobs and work processes.

Real-world examples illustrate its practical applications to enhance productivity and work quality. Ethical and security considerations are also emphasised. Ultimately, the course aims to empower participants with the knowledge and skills to engage in informed discussions about Generative AI and effectively utilise it in their professional lives, encouraging critical engagement with the material to gain a comprehensive understanding.

Artificial Intelligence (AI) & Machine Learning (ML) for Business Leaders

ABOUT THIS PROGRAMME

Artificial Intelligence and Machine Learning are considered to be the most disruptive technologies by chief intelligence and information officers worldwide. However, very few business leaders and managers fully understand how AI and ML can be leveraged to drive growth, efficiency, insight and an unrivalled customer experience. To compound this challenge, AI and ML capabilities are constantly evolving.

The MANCOSA skillME Artificial Intelligence (AI) and Machine Learning (ML) short learning programme (SLP) has been developed by industry experts to provide business leaders and managers with a robust understanding of AI and ML as business tools. The programme develops the skills that are required in order to strategically and successfully implement AI and ML within an organisation, in order to power competitive advantages and drive value creation.

Cybersecurity: Managing Risk in Information Age

ABOUT THIS PROGRAMME

In the digital economy, information systems serve as critical assets for completive advantage as well as a source for strategic security risk. Organisations now have complex digital ecosystems rooted at the heart of their success and it is incumbent upon business managers and leaders to be acutely aware of the challenges and risks that cybersecurity threats pose to their continued operations. “There are two types of companies: those that have been hacked, and those who don’t yet know they have been hacked.” – John Chambers (CEO: Cisco) The MANCOSA skillME Cybersecurity: Managing Risk in the Information Age short learning programme (SLP) has been developed by industry experts to provide business leaders and managers with a robust understanding of their role and responsibility in protecting digital systems by mitigating cyber threats. The programme develops the skills that are required in order to strategically and successfully influence the overall cybersecurity posture within an organisation, in order to develop an appropriate level of protection against predicted cyber threats.

Digital Transformation in 21st Century Workplace

ABOUT THIS PROGRAMME

The emergence of the fourth Industrial Revolution (4IR) coupled with rapid advancements in information and digital technologies has resulted in ongoing and unprecedented transformation in the 21st century workplace. Almost every organisation has either proactively or been forced to digitally transform. However, not all digital transformation initiatives are successful. According to McKinsey, a global consulting firm, up to 70% of digital transformation efforts fail. However, for those organisations that are successful in their digital transformation agendas, a competitive, and oft en unrivalled digital paradise awaits. The MANCOSA skillME Digital Transformation in the 21st Century Workplace short learning programme (SLP) has been developed by industry experts to provide individuals with a robust understanding of why and how digital transformation can be pursued successfully. The programme develops the skills that are required in order to successfully stimulate and influence an organisation's digital transformation trajectory.

The 4th Industrial Revolution (IR) and Automation

ABOUT THIS PROGRAMME

One of the defining features of the Forth Industrial Revolution is the unprecedented level of automation being introduced in the new world of work. With rapid advancements in robotics, machine learning (ML), artificial intelligence (AI) and the Internet of Things (IoT), automation has already transformed many industries, sectors and organisations. The phenomena of the 4IR and automation are multidimensional and are constantly evolving with innovation in technology. Understanding this digitally driven panorama is paramount for an individual seeking to survive and thrive in the 4IR.

The MANCOSA skillME 4IR & Automation short learning programme (SLP) has been developed by industry experts to provide individuals with an understanding of a driving force of the modern workplace – automation. The programme develops the skills that are required in order to leverage the digital technologies that underscore automation, whilst also providing individuals with a robust understanding of how automation can be utilised as a strategy to drive efficiency and effectiveness within organisations.

Le Wagon: Data Science Bootcamp – Cape Town

ABOUT THIS PROGRAMME

This intensive programme is designed to provide participants with the skills and knowledge needed to succeed in Data Science. Each bootcamp runs for a duration of 9 weeks, ensuring a focused and immersive learning experience.

During the Data Science bootcamp, participants will dive into the world of data analysis, machine learning, and data visualization. They will learn how to extract valuable insights from large datasets, build predictive models, and effectively communicate their findings.

The curriculum covers Python programming, statistics, SQL, and machine learning algorithms, among other essential topics.

Take this programme to:

- By completing the Data Science bootcamp, participants will become proficient in data analysis techniques, enabling them to extract meaningful insights from complex datasets. They will be equipped with the skills to apply machine learning algorithms and predictive modeling to solve real-world problems. Graduates will be well-prepared to pursue careers as data scientists, data analysts, or machine learning engineers in various industries.

User requirements:

- The bootcamp programs at Le Wagon South Africa are open to individuals from various backgrounds and experience levels. While prior programming experience is not required, a passion for technology and a willingness to learn are essential. The admission process involves a selective application review and an interview to assess the candidate's motivation and commitment.
- For the Data Science bootcamp, basic knowledge of mathematics and statistics is beneficial, but not mandatory. Participants should bring their own laptops to fully engage in the hands-on coding exercises and projects.

Additional benefits:

- Dedicated support: Participants receive personalized assistance and mentorship from experienced instructors and teaching assistants throughout the program.
- Networking opportunities: Students have the chance to connect with a vibrant community of like-minded individuals, including alumni, industry professionals, and guest speakers.
- Career services: Le Wagon South Africa provides guidance and resources to help participants in their job search, including interview preparation, resume building, and access to a network of hiring partners.
- Demo Day: At the end of the bootcamp, participants have the opportunity to showcase their projects to potential employers and receive valuable feedback.

Supply Chain Management: Digital Transformation and Optimisation

ABOUT THIS PROGRAMME

Significant leaps have been achieved across industries with the advent of the Fourth Industrial Revolution (4IR). Digital transformation has poses tremendous scope and opportunity for the optimisation of supply chains and the management of such.

This course will develop an understanding of how key relationships in supply chains can help you cut costs, boost performance, and create more value for customers.

We will focus on the management of both domestic and international supply chains, what risks arise within supply chain management and how to mitigate against such risks.

The course will then explore how digital transformation of supply chain management should be included as part of a company's overall strategy.

Psychiatric Patient Care

ABOUT THIS PROGRAMME

Understanding the needs of individuals grappling with serious mental illness is essential for fostering their recovery. “Recovery involves the development of new meaning and purpose in one’s life as one grows beyond the catastrophic effects of mental illness’’.

While recovery is a personal journey, it is not one that individuals can undertake entirely on their own. It necessitates the support of family, friends, and a multi disciplinary team (MDT).

The MDT comprises of various healthcare professionals collaborating to deliver comprehensive patient care, including psychiatrists, nurses, occupational therapists, and psychologists.

This short learning programme, crafted by industry experts, equips healthcare workers with a robust grasp of patient care in the realm of psychiatric illness.

Public Healthcare: Health Promotion

ABOUT THIS PROGRAMME

Public healthcare aims to provide communities with access to healthcare at hospitals and clinics. On the other hand, health promotion is the science and art of enabling people to increase self-control and improve their overall wellbeing.

Factors such as life expectancy, childhood obesity, future pandemics and other environmental factors have a major impact on public health.

Health promotion assists in mitigating negative impacts on public health by empowering people to enhance self-management and improve their overall health and well-being.

This short learning programme has been developed by industry experts to provide healthcare workers involved in the public healthcare domain with a comprehensive understanding of strategy, management, and implementation of delivering public health services.

Infection Prevention and Control for Healthcare

ABOUT THIS PROGRAMME

CPD Points: 6

"Healthcare-associated infections (HAIs) are one of the frequently encountered patient safety incidents in care delivery and poses a major public health challenge impacting on morbidity, mortality and quality of life. The prevalence of HAIs in mixed patient populati ons of low to middle-income countries (like South Africa) is approximately twice that of high-income countries.

These infections also present a significant economic burden at the societal and health facility level. Effective infection prevention and control programmes have been proven to be one of the cornerstones for combating HAIs and anti microbial resistance" -Dr. T Pillay (acting Director-General: Health, March 2022).

This short learning programme has been developed by industry experts to provide healthcare workers with a holistic understanding of how to develop and implement standard infection prevention control measures, to prevent the outbreak and spread of infections in South African healthcare facilities.

Good Clinical Practice

ABOUT THIS PROGRAMME

In South Africa, the healthcare system faces a stark divide: only 17% have private medical aid, leaving 83% reliant on state-funded services. Efforts are underway to bridge this gap, exploring new funding models and advocating for National Health Insurance to create equitable access for all South Africans.

The rapid development in technology has created a more informed and selective patient thereby increasing the importance of a customer-centric and outcomes-based service from healthcare providers.

This short learning programme has been developed by industry experts to assist healthcare workers in keeping abreast with contemporary principles of good clinical practice and seeks to reinforce patients' rights when engaging in healthcare services.

It emphasizes the responsibility that healthcare providers must provide the best care possible while keeping sight of the current changing healthcare landscape within the South African context.

Ethics for Healthcare Professionals

ABOUT THIS PROGRAMME

Ethical values are essential for any healthcare professional. Ethics are moral principles that govern how a person or a group will behave or conduct themselves. The focus pertains to right and wrong actions and encompasses the decision-making process of determining the ultimate consequences of those actions. To practice competently and with integrity, nurses must have regulation and guidance within the profession, like all healthcare professionals.

This short learning programme has been developed by industry experts to equip nurses at all levels, who have their own set of personal ethics and morals, to recognise dilemmas in healthcare, make value-based judgements and decisions while keeping within the laws that govern them.

Human Papillomavirus (HPV) Training

ABOUT THIS PROGRAMME

This comprehensive training programme has been crafted to provide healthcare workers with in-depth knowledge and practical skills pertaining to cervical cancer, human papillomavirus (HPV), HPV vaccination and their relationship to sexual reproductive health. The programme will cover topics such as HPV epidemiology, vaccination guidelines, patient counselling, and the broader context of sexual reproductive health services provided by healthcare professionals.

This short learning programme has been developed by industry experts and was created by MANCOSA in partnership with Strategic Health Solutions to provide healthcare workers with a comprehensive understanding of HPV and an overview of sexual reproductive health.
